Vcarve Makerspace Edition / Version 11.5

Steps for installing the Vectric Vcarve Trial Edition (Makerspace Edition)

NOTE:

- 1) Makerspace users will be required to access the invitation link and add their email address. If they already have a V&Co account, they should use the email address associated with their account.**
- 2) After signing up they will receive an email with an invitation link that they must access in order to complete the membership signup process.**
- 3) Once this is done, they will be able to sign into the VCarve Pro Trial software and create projects to cut in your Makerspace.**
- 4) Use link below to download the execution file provided to install Vcarve from the Vectric website.**

<https://portal.vectric.com/organization/shared-invite/323m7naChyhVyWWNyxmS>

- 5) After Install, OPEN the software.

-You now have the Vcarve Makerspace Client Edition installed and can use any of its features except for the final steps in creating G code for your project.

-You must bring your saved .crv file into Makerlab and create the G code on one of our full versions provided on the main PC or a few of the laptops labeled Vcarve Pro.

-When opening Vcarve at Makerlab, you will be asked to login using your email attached to your Vectric Vcarve account. A code will be emailed to that email address as a final verification for access.
